

# Procedure for Installing the Android Application

## Download the APK File

Access the Dropbox link provided and download the APK file directly onto your Android device.

## Locate the Downloaded File

Upon successful download, navigate to the 'Downloads' folder or appropriate storage location on the device to locate the APK file.

## Initiate Installation

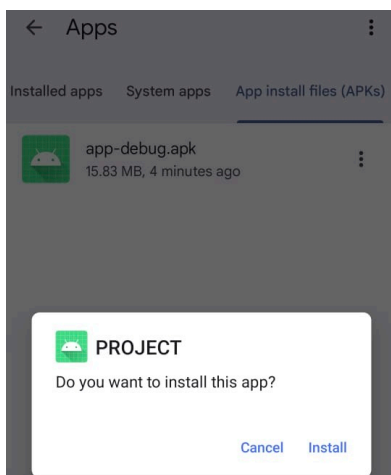

Tap on the APK file to begin the installation process. If prompted, allow installation from unknown sources in the device settings.

## Security Verification

When the prompt 'App scan recommended' appears, tap 'Scan app' to perform the recommended security check.

## Install the Application

Once the scan is completed, tap 'Install' to proceed with the application installation.

## Confirmation and Usage

After the installation is successfully completed, the application will be available for use and can be accessed from the app drawer or home screen.
